

Sanket Sachin Navale

(410) 805-0423 | snavale1@jh.edu | [LinkedIn](#)

AI Product Manager with 2+ years of experience in defining AI/ML product strategies, market research, and technical prototyping. Passionate about Generative AI, RAG, and Agentic workflows. Skilled in bridging the gap between research and engineering to deliver scalable AI solutions.

EDUCATION

Johns Hopkins University

August 2025 - December 2026

Master of Science in Engineering Management

Baltimore, US

• **Coursework:** Accounting & Finance | Strategies in Innovation & Growth | Agile Software Development Methods | Project Management

Walchand Institute of Technology

August 2019 - May 2023

Bachelor of Science in Information Technology

GPA: 3.74/4.0 | Solapur, IN

• **Coursework:** Project Management | DevOps | Cloud Computing | Database Management Systems | Management Information Systems

PROFESSIONAL EXPERIENCE

Product Strategy Consultant - AI & Governance | Amazon Web Services

Remote | October 2025 - Present

- Defined the product vision for a "Unified AI Governance" framework, conducting technical research on emerging threats like **Prompt Injection** and **Data Poisoning** to inform feature prioritization for agentic workflows
- Developed a white paper on **Agentic AI** governance, analyzing the risks of autonomous multi-agent systems and proposing a 3-layer mitigation strategy including **Real-time Monitoring** and Tiered Access controls
- Collaborated with industry experts to validate the technical need for "**Machine-Readable Policies**," identifying a critical gap in current governance tools that limits AI scalability in regulated industries

Product Strategy Consultant - AI/ML Infrastructure | Johns Hopkins Hospital

Baltimore, US | August 2025 - October 2025

- Designed a technical prototype for an **NFC-based** patient tracking system, defining the **API requirements** and data flow between bedside hardware and the **Epic EHR** system to automate timestamp logging
- Analyzed operational datasets using **Tableau** simulations to model patient flow, identifying that a "Shift Overlap" intervention would statistically reduce hold times and improve data accuracy
- Proposed a digital dashboard solution for Environmental Services, outlining the **API integration** required for real-time room status updates to improve bed turnover efficiency

Software Engineer | Persistent Systems Limited

Verna, IN | September 2023 - July 2025

- Engineered scalable **CI/CD pipelines** using **Docker** and **Kubernetes** to support a Multi-Cloud SaaS product, reducing deployment time by 67% and ensuring high availability across AWS and Azure
- Collaborated with **DevOps** teams to automate infrastructure provisioning using **Terraform** (IaC), streamlining the onboarding process for new tenants on the SaaS platform
- Optimized database performance for 10,000+ users by refactoring **SQL queries** and implementing caching strategies, resulting in a 47% reduction in query latency

PROJECTS

AI-Powered Traffic Analytics Platform

September 2022 - March 2023

- Led discovery workshops to define AI/ML use cases and prioritize product roadmap
- Built TensorFlow/OpenCV models (95% accuracy), benchmarked baselines, and deployed on AWS Lambda (<100ms)
- Launched MVP across 3 cities (10k+ users) and implemented responsible-AI guardrails for bias and safety

Agriculture Equipment Marketplace

September 2021 - August 2022

- Defined and built AI-ready marketplace using Golang microservices and ReactJs to enable personalization
- Implemented IaC (Terraform, Docker), enabling 70% faster release cycles and continuous A/B testing
- Led user research (50+ focus groups), produced 30+ insights, increasing adoption 40%

Healthcare Resource Management System

March 2021 - June 2021

- Led requirements across 50+ facilities; designed EHR-integrated architecture and operational dashboards
- Assessed data quality, HIPAA compliance, and feasibility; designed prototypes to validate ROI
- Piloted prototype reducing patient delays 15% and improving throughput 20%, securing enterprise adoption

SKILLS & CERTIFICATIONS

- AI/ML:** AI Product Strategy, Machine Learning Development, LLM Evaluation, Generative AI Strategy, ML Model Evaluation & Benchmarking, AI Governance, Responsible AI, Prompt Engineering, Bias & Fairness, Model Deployment, MLOps
- Product & Leadership:** Product Strategy, Roadmap Planning, Vendor Evaluation, Market Analysis, Stakeholder Alignment, Technical Leadership, Data-Driven Decision Making, Cross-Functional Leadership, Change Management, Agile/Scrum
- Technical:** TensorFlow, PyTorch, Python, Golang, JavaScript, SQL, Machine Learning Algorithms, Deep Learning, NLP, Computer Vision (OpenCV), Model Training & Fine-tuning, Data Pipelines, Model Inference & Serving
- Cloud & DevOps:** AWS (SageMaker, Lambda, CloudWatch), Azure Cloud, Azure ML, Google Cloud (Vertex AI, BigQuery), Docker, Kubernetes, Terraform, CI/CD Pipelines, Git, MLOps, IBM Cloud, IBM watsonx ai, ArgoCD
- Certifications:** AWS Cloud Practitioner, Microsoft Azure Fundamentals, Google IT Support Professional, Python for Data Science, Machine Learning Fundamentals

EXTRACURRICULAR ACTIVITIES

Smart India Hackathon finalist developing innovative financial technology and healthcare solutions. Active in organizing technical events and volunteering for community initiatives including financial literacy programs and agricultural support programs.
